

# ROAD MAP: Master Teacher Academy At-A-Glance

## PLANNING

### **Self-Evaluation**

Identify strengths, weaknesses, and possible areas for improvement that are important to your classroom practice and the learners with whom you work.

### **Design A SMART Action Learning Plan**

Develop a personal **SMART Action Learning Plan** to conduct between Master Teacher Academy sessions. Outline the step-by step sequence of activities from inception to evaluation. Make sure your plan is Specific, Measureable, Adaptable, Realistic, with a Timeframe.

## ACTION

### **Implement your SMART Action Learning Plan**

Carry out the steps of your SMART Action Learning Plan.

Systematically record information about the results.

## REFLECTION

### **Draw Conclusions and Share your Findings**

Reflect on your experiences implementing your SMART Action Learning Plan and prepare a written Master Teacher Report describing what you and your students learned, and what your findings mean for changing your practice.

- What effect did this project have on your learners?
- What worked well?
- What could have gone better?
- What professional knowledge and skill have you gained?
- What was your most important realization?
- What are you going to start doing differently as a result of this experience?
